

Procedures and Information for Recycling Computers and Computer peripherals

1. Items we collect under this Program:
Computer monitors, computer towers and all internal parts, servers, racks, mainframes, keyboards, mice, cabling, external peripherals (i.e. external modems, disc drives, routers, etc.)
2. Computer Monitors can be in non-working condition. We cannot accept monitors where the picture tube is shattered.
3. Please call ahead to schedule this service, so that we may prepare our trucks to handle this type of material.
4. If you are a regular customer, collections made on your regularly scheduled day will incur less expense to you. However, if the amount of computer equipment you are recycling is more than our vehicle can handle, then we will have to schedule a special collection.
5. If you are a not one of our current customers and are in need of a special one time collection, we can accommodate you with our "one time customer rate" pickup of your computer equipment.
6. Please call us (919.680.6262) or email us info@shimar.com for pricing information. If e-mailing, please be prepared to tell us the type of equipment you will be sending.
